

What is EON Creator™?

EON Creator is a robust set of automatic ease-of use tools to help users build their own customized virtual environment in minutes and direct access to interactive learning content, including an option to display content in stereoscopic 3D. EON Creator offers a new innovative way to design and present 3D data.

“EON Creator represents the next generation of 3D interactive content creation tools that can enable the beginner and novice to create their own learning environments to enhance and supplement learning activities with an immersive, interactive, learning experience. EON Creator is a new resource that can help educators close the content development gap and develop their own learning modules and applications.”

*Jamie Justice, Director of Visualized Learning and Innovation
Kentucky Community and Technical College System*

How to get started

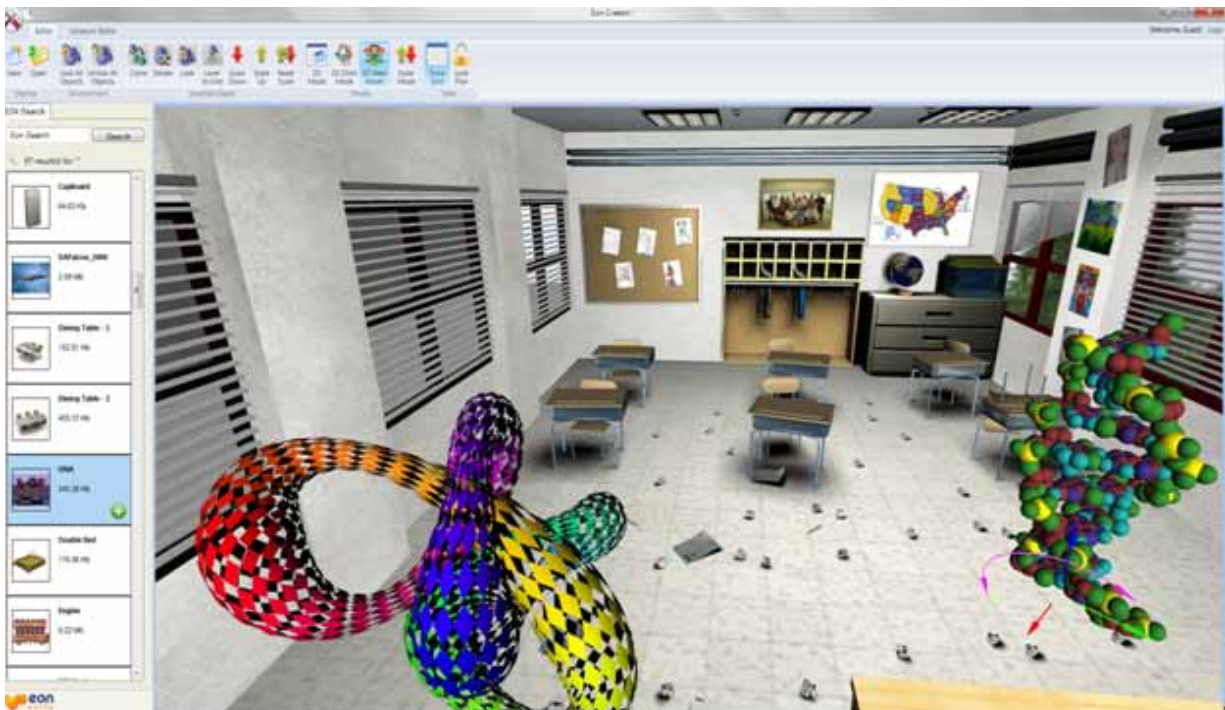

EON Creator offers an extremely easy-to-use software with direct access to the large database of interactive and optimized 3D content on EON Experience Portal. It is tool that allows users to build engaging interactive learning simulations for training, education and presentation purposes. How to get started:

- Use your own 3D content and export it through EON Raptor, EON Professional or EON Ultra into an EON format or search and Find from thousands of interactive 3D models on the EON Experience Portal.
- **Create** your own customized 3D scenes with EON Creator.
- Present, experience and **Share** your scenes in stereoscopic 3D through EON Creator PRO.

Key Features

EON Creator addresses the need for effective 3D Learning by including the following key features:

- Extreme **ease-of-use**
- **Support for 3ds Max models** through EON Raptor, a free software
- Supports some **+100 different 3D / CAD data** files through EON Professional (additional option)
- Direct support for **search and import of thousands of interactive 3D objects** from EON Experience Portal
- **Easy scene editing** including position, rotation and scale of objects
- **Trigger interactions** of objects with intuitive pop-up menus in 3D window
- **Quick authoring of environments** and content for use in EON Coliseum
- **Placement of presentation surfaces** for video, PowerPoint, and 3D objects for use in EON Coliseum
- **Support for stereoscopic 3D presentations** in EON Creator PRO. Through the EON Icatcher Mini system, EON Creator PRO offers a turn-key solution for Interactive 3D Stereo presentations in the Classroom.
